PROFILE SUMMARY

An aspiring fresher and recent graduate with a solid background in Python, Machine Learning, and SAP technologies (including ABAP and BTP), I have a strong understanding of essential programming concepts. I have gained practical experience through academic projects and independent ventures, where I successfully utilized my technical skills to create effective solutions. With a genuine passion for technology and a dedication to continuous learning, I am enthusiastic about contributing to innovative, high-impact teams.

WORK EXPERIENCE

oct 2025-present

Datapoint Info Solutions Pvt. Ltd.

Role & Responsibility: Held the position of Python Developer and IT Trainer, where I acquired substantial expertise in the Django framework. In addition to my development duties, I spearheaded the creation of generative AI projects, ensuring their seamless integration with cloud technologies and a variety of web services. I also worked with the Streamlit, Gradio, and Flask frameworks to enhance the functionality and user experience of these projects.

PROJECT EXPERIENCE

- Enhanced the accuracy of smart surveillance cameras by 15% through the implementation of a modified Convolutional Neural Network (CNN) model, significantly reducing false positives during real-time video processing.
- Executed customer segmentation using K-Means clustering, resulting in a 20% increase in the effectiveness of targeted marketing campaigns through a comprehensive analysis of demographic data.
- Developed an Artificial Neural Network (ANN) and an OpenCV-based model for predicting age and gender, achieving over 85% accuracy with facial image datasets.
- Designed an interactive obesity prediction dashboard utilizing Streamlit, which enables real-time health risk assessments for users. Leveraged Python data analysis libraries (NumPy, Pandas, Matplotlib) to clean, visualize, and interpret complex datasets, accelerating insights generation by 30%.
- Additionally, created a chatbot to detect signs of depression through real-time facial emotion analysis. Built a simple calculator using Java.
- Developed a depression detection chatbot utilizing the Django framework and OpenCV, employing algorithms such as Logistic Regression and Naive Bayes to assess users' mental health.
- Created a voice assistant named Min_Sonu that mimics functionalities similar to Alexa and Siri, employing speech recognition and gtts models alongside text processing through Natural Language Processing (NLP).
- Established a smart help desk to assist users with their queries, automatically resolving issues through LLM stubs and AI triage, utilizing MongoDB for data storage.
- Architected a recipe finder application using React.js and npm, empowering users to discover recipes based on ingredient inputs, which received positive feedback and led to the implementation of three feature requests.

EDUCATION

Bachelors of Technology in Computer Science and Engineering(AI ML)| 2021 - 2025
Princeton Institute of Engineering &Technology for Women (Affiliated to JNTUH),Ghatkesar Hyderabad,Telanagana CGPA:7.3

Intermediate (MPC) | 2019 - 2021
Jr.Wisdom College for Women,Tarnaka(Affiliated to TSBIE)
Percentage:96.4%

SSC Matriculation | 2018 - 2019,
ZPHS Uppal Kalan,Uppal,Hyderabad,500039
CGPA9.3

SKILLS

- Programming Languages:
  - Python:Utilized extensively for data analysis and automation scripts, developing efficient algorithms for data processing tasks.
  - C: Applied in developing embedded systems and performance-critical applications, focusing on hardware interaction and memory management.
  - C++: Employed in creating robust software solutions, leveraging object-oriented features to enhance code reusability and maintainability.
  - ABAP:Used for customizing SAP applications and developing business solutions to streamline operations within enterprise environments.
  - C#:Developed desktop applications and game development projects, utilizing .NET frameworks for rapid application development.
- Web Development:
  - HTML & CSS: Created responsive and visually appealing web pages, ensuring cross-browser compatibility and user-friendly interfaces.
  - JavaScript: Implemented dynamic functionality on web pages, enhancing user interaction and experience through custom scripts.
  - PHP: Developed server-side applications, handling form submissions and database interactions to build functional web applications.
  - REST API:Designed and integrated RESTful services to enable seamless communication between client and server applications.
  - .NET:Built scalable web applications using the .NET framework, focusing on security and performance optimization.
  - Node.js & Express.js:Developed backend solutions for web applications, managing server-side operations and API endpoints.
  - React.js: Created interactive user interfaces, applying component-based architecture to enhance application scalability and maintainability.
- Data Analytics:
  - NumPy & Pandas:Conducted data manipulation and analysis, performing operations on large datasets to derive actionable insights.
  - Matplotlib & Seaborn:Visualized complex data sets, creating informative plots and graphs to support data-driven decision-making.
  - Azure ML Studio: Developed and deployed machine learning models, utilizing cloud resources for scalable and efficient data processing.
  - PySpark:Processed large-scale data analytics tasks, leveraging distributed computing capabilities for enhanced performance.

- ERP & Cloud Platforms:
- SAP:Implemented and customized ERP solutions, optimizing business processes and facilitating seamless data integration.
- BTP:Utilized Business Technology Platform for developing and managing enterprise-grade applications, enhancing digital transformation.
- Azure:Deployed cloud-based solutions, managing virtual machines and storage to support scalable and reliable applications.

CERTIFICATES

- Certified in DSA C++ ,Prompt engineering from Lets upgrade
- Certified in Advanced Course (ML, IoT, SAP, ABAP, BTP) – Edunet Foundation
- Certified in DCA Course from DELL
- Certified from Oracle University in Gen-AI professional associate
- Certfied from Oracle University in DataScience Professional
